Subject: Microsoft Antitrust Litigation

Dear sir's,

I am a completely satisfied customer of Microsoft products from the DOS to the present Windows operating systems. I believe that Microsoft has pioneered the computer industry and has given the consumer high performance equipment in the marketplace where others have competed fairly to provide freedom of choice at a fair price. The consumer has benefited from Microsoft products and business practices. I believe the case against Microsoft is without merit and is sponsored by those who have not been as successful in the marketplace as Microsoft. I believe the settlement that Microsoft has proposed is fair and urge you to approve it.

Thank you
Frank Perara
